

LEGRAND®

adore™ Under-Cabinet Lighting System

a recipe for kitchen magic

Make dark spaces shine. Relocate outlets to suit your workflow needs. Add lights, speakers, USB charging and portable device docks to build your dream kitchen. The Legrand® adore™ Under-Cabinet Lighting System is a fully customizable, modular solution for eliminating kitchen clutter. Because it's modular, it's compatible with any kitchen layout and can be hard-wired or plugged into any home wiring configuration. While the adore Under-Cabinet Lighting System was designed with kitchens in mind, it can also be used in offices, hospitality and healthcare applications. Best of all, once it's installed, you'll never know it's there and you'll wonder how you survived without it.

- **Modular Track available in three lengths.** The backbone of the system provides convenient and relocatable access for power outlets, LED lighting, USB charging and digital music and it all tucks away out of sight under any size cabinet. Fits any size cabinet width from 12" up. Track snaps together for easy installation and wiring.
- **Removable Modules.** Snap-in modules are interchangeable, so access to power or USB charging is as easy as swapping modules. Modules can also be relocated or changed out as workflow or power needs change.
- **Hardwire or plug-in installation.** Easy installation to any existing residential wiring system, or simply plug-in to an exiting outlet. Hardwired installation can be backfed or surface mounted with multiple 1- or 2-gang control boxes.
- **Plug-In LED Lighting.** Each LED lighting component has a correlated color temperature of 3000 kelvin and a color rendering index of 95 to illuminate areas with warm, inviting color.
- **Digital Music Kit.** Provides high-performance full, rich stereo sound with DSP (Digital Signal Processing). BLUETOOTH® enabled wireless speakers provide easy pairing and access to digital music libraries while USB charging keeps the music playing.

designed to be better.™

1. Planning Your System Layout – First, determine where you want to install the system. Then measure your cabinets to determine the length of Modular Track required.

12" Modular Track

18" Modular Track

27" Modular Track

18" Modular Track Extender

Modular Track Corner Connector

3. Add LED Lights – The adorne Under-Cabinet Lighting System is only compatible with adorne LED lights. Recommended placement for lights is every 18" along Modular Track.

In addition, if you are mounting a light under the cabinet and wish to move it further to the front of the counter, you can use the LED Light Extender. This enables you to increase the length of any light from the Modular Track from a standard 11" to up to 22". This is especially useful in corner installations.

Light Extender

2. Choose Control Box & Power Options – Next, select the type of lighting and power connection you'd like to include. For a simple install, the Plug-In Control Box provides the easiest solution. For a hardwired installation, there are five options to choose from which enable expanded lighting control options such as dimming.

Control Boxes

1-Gang Control Box with Paddle Dimmer

2-Gang Control Box with Paddle Dimmer and 15A GFCI

Direct Wire Connector

Control Box, No Devices, 1-Gang*

Control Box, No Devices, 2-Gang*

Plug-In Control Box

4. Select Accessories to Complete the System – The final step is to select the accessories to perfectly complement your system. adorne offers a range of options, including USB charging ports, mobile and tablet cradles, and a Digital Music Kit. Each of these accessories provides flexibility in that it can be added or removed at any time – simply swap it with an existing outlet or blank module to increase your system capabilities.
