# Product Environmental Profile

Wattstopper<sup>®</sup> - LMRC-102 Room Controller

### COMPANY OVERVIEW

• Sustainability built in to support our associates, customers, and the environment

At Legrand North America, we're committed to leading by example within our own operations, to developing high quality solutions for our customers' High Performance Buildings, and to transforming how people live and work – more safely, more comfortably, more efficiently.

#### Better Performance

A core principle of designing for sustainability drives us to innovate products and systems that enable buildings to reach exceptional levels of performance, bringing about industry-leading ideas, inventions and initiatives.

#### Better Operations

A commitment to a leadership role in operational excellence through environmental management, optimizing the way we manage energy, water and waste.

Better Lives

A dedication to enhancing employee and community welfare through programs that help people enjoy healthier, more productive and more rewarding lives.

For more information on Legrand's PEPs and other sustainability initiatives, visit legrand.us/sustainability.

## LEGRAND'S ENVIRONMENTAL COMMITMENTS

Incorporate environmental management into our industrial sites
 Of all Legrand sites worldwide (belonging to Legrand for more than five years), over 85% are ISO 14001 certified.

### Offer our customers environmentally friendly solutions

Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

• Involve the environment in product design

Reduce the environmental impact of products over their whole life cycle.

Provide our customers with all relevant information (composition, consumption, end of life, etc.).

### REFERENCE PRODUCT

Function	LMRC-100 Series Room Controllers operate on one, single phase 120/230/240/277 volt, 20 amp, feed and pro Class 2 power to sensors and switches. The room controllers switch lighting or motor loads on and off in resp input from the communicating devices continuously for a period of 10 years.					
Reference Product	Part Number: LMRC-102					
	Room Controller.

# Product Environmental Profile

Wattstopper<sup>®</sup> - LMRC-102 Room Controller

### PRODUCTS CONCERNED

The environmental data is representative of the following products:

LMRC-10x, LMPL-101, and all -U models (LMKT-DEMO)

Where "-x" is any combination of numbers or letters that specify: - BAA/TAA Complaince (e.g., LMRC-102-U)

- Color

### CONSTITUENT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market. It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/EC.

Total weight of Reference Product (with unit packaging)	(318.40 g	)						
Plastics as % of weight	Metals as % of weight			Other as % of weight				
Acrylonitrile Butadiene Styrene	30.8%	Copper Alloys	3.8%	Various Electronic Components	41.1%			
Polyethylene	2.8%	Steel	.4%					
Polyvinyl Chloride	1.8%							
Other Plastics	.6%			Packaging as % of weight				
				Paper/ Cardboard	19%			
Total plastics	36%	Total metals	4%	Total other and packaging	60%			

Estimated recycled material content: 7% of weight.

### MANUFACTURING

The Reference Product comes from sites that have received ISO 14001 certification.

### **DISTRIBUTION**

Products are distributed from logistics centers located to optimize transport efficiency using EPA SmartWay<sup>®</sup> certified carriers to reduce greenhouse gas emissions. Information on the distance of distribution is not available, so the PCR hypothesis for "Intercontinental transport," 2175 miles (3500 km) by heavy truck, was used. This represents transportation of the Reference Product from our warehouse to the local point of distribution in the North American market.

Wattstopper<sup>®</sup> - LMRC-102 Room Controller

### **INSTALLATION**

No required components, products, parts nor processes for installation. No electricity is required for installing the Reference Product.

## USE

### Servicing and maintenance:

Under normal conditions of use, this type of product requires no servicing or maintenance.

#### Consumable:

No consumables are necessary to use this type of product.

### END OF LIFE

• Hazardous waste<sup>\*</sup> contained in the product:

No hazardous waste.

\*Hazardous waste as defined by European Commission decision 2000/532/EC.

Recycling rate:

Calculated using the method described in the IEC/TR 62635 technical report; the recyclability rate of the Reference Product, including packaging, is estimated as 57%. This value is based on data collected from a technological channel using industrial procedures. It does not pre-validate the effective use of this channel for end-of-life electrical and electronic products.

(% mass of Reference Product without packaging)

Separated into:

- plastic materials (excluding packaging): 34%
- metal materials (excluding packaging): 4%
- packaging (all types of materials): 19%

### ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use and end of life. It is representative of products marketed and used in North America.

The following modelling elements were taken into account:

Manufacturing	Packaging taken into account. As required by the PEP ecopassport program, all transport for the manufacturing of the Reference Product, including materials and components, has been taken into account. International transport, as defined by the PCR, was used to take into account transportation from the production site to the final distribution center. The waste generated during manufacturing phase has been taken into account.					
Distribution	Transport between the last distribution center and an average delivery to the sales area.					
Installation	The end of life of the packaging is taken into account at this phase. Transport of packaging to end of life treatment.					
Use	<ul> <li>Under normal conditions of use, this type of product requires no servicing or maintenance.</li> <li>No consumables are necessary to use this type of product.</li> <li>Product category: Other equipment - Category 2, active product</li> <li>Use scenario: Active mode (5.31W) in continuous operation (100% of the time) for 10 years. This modeling duration does not constitute a minimum durability requirement.</li> <li>Energy model: Electricity (US) - 2009.</li> </ul>					
End of life	The default end of life scenario modeled maximizes the environmental impact.					
Software used	tware used EIME V5 and its database, "CODDE-2015-04," and the indicators defined in the PCR ed 3 in alignment with the EN15804 standard.

The values of the 27 impacts defined in the PCR-ed3-EN-2015 04 02 are available in the digital database of the pep-ecopassport.org website. The environmental impacts of the Reference Product are representative of the products covered by the PEP, which therefore constitute a homogeneous environmental family.

The environmental impact of the Reference Product occurs predominantly during the manufacturing and use phases.
