

## Pass and Seymour Hospital Grade Amber Power-Indicating LED Tamper-Resistant 15A Duplex Self-Test GFCI Receptacles with SafeLock® Protection, Red Part No. 1597HGTRPIAMBRED

Conducts an automatic test every three seconds, ensuring it's always ready to protect. If the device fails the test, the indicator light flashes to signal that the GFCI should be replaced. It also has our proven SafeLock® Protection—if critical components are damaged and ground fault protection is lost, power to the receptacle is disconnected. Visual LED power identification of receptacles to ensure proper functionality for necessary loads. For detailed Tamper-Resistant receptacle information, visit our Tamper-Resistant Receptacles page.

## Features & Benefits

Protects against shock caused by ground-fault occurrences. GFCI receptacles make it easier to Power-indicating amber LED provides visual indication of power being present at the fix trips with a reset button right on the device.

Hospital Grade GFCIs are subjected to additional performance requirements, including reliability, integrity, strength, and durability tests.

Conducts an industry-leading automatic self-test every 3 seconds. The trip indicator light flashes if the device fails the self-test, signaling the GFCI is to be replaced.

GFCIs prevent line-load reversal due to inadvertent miswire; there is no power to the face or downstream receptacles if wired incorrectly.

Auto-ground clip assures a positive ground to metal box.

Enhanced tamper-resistant automatic shutter system allows for easier plug insertion while inhibiting young children or others from inserting objects.

Equipped with patented SafeLock® protection. If critical components are damaged and ground-fault protection is lost, power to the receptacle is disconnected.

 $High-impact-resistant, thermoplastic \ construction \ for \ superior \ strength \ and \ durability.$ 

FSUL listed (Federal Specification WC596).
