Legrand®

Wattstopper
DMX Splitter 4 Channel
Part No. DMX-SPLITTER

The Wattstopper DMX-SPLITTER is a repeater that divides and regenerates the DMX/RDM input signal into four output channels. It is used with DMX controlled lighting systems when the maximum of 32 devices per bus run is exceeded. In this way, more devices can be added to a DMX network without adding a new DMX-DALI controller. In addition to DMX, the DMX-SPLITTER also distributes RDM messages for devices that use RDM

Features & Benefits

One into four DMX/RDM splitter and signal repeater

Increases the maximum DMX devices on a network by 4X

Up to 4 DMX-SPLITTERs per DMX network

Works with DMX-DALI-GW gateway for a full universe of DMX control
