

Legrand
AC Low Voltage Photocell
Part No. EM-24A2

The EM-24A2 and EM-24D2 are low voltage photocells used for controlling exterior lighting. It works with Wattstopper power packs and lighting control panels (Lighting Integrator and LP series panels) by signalling a change in light levels to the panel.

Features & Benefits

Low voltage photocell automatically turns lighting on and off
Raintight gray plastic enclosure
Simple to wire and install

Mounts on building exterior or roof

Compatible with all Wattstopper lighting control panels and power packs

Adjustable aperture window for varying ON setpoint
