The LMEC-100 Emergency Lighting Control Unit allows Blanco or Araya lighting control devices (Logic modules) for normal lighting to also control emergency lighting installed within the area. With the loss of normal power, the fixture will go full 100% ON and full CCT if applicable to the Blanco or Araya lighting control devices. When normal power is restored, the lighting fixtures can be controlled and returned to their normal state.

Features & Benefits

Bypasses line voltage and 0-10V dimming signal to ensure an emergency fixture illuminates at full brightness during a power interruption

Universal mounting provides flush, fixture, plenum, or panel mounting

Test switch and LED allow for quick testing of proper function

Converts 20A of normal light fixtures to approved emergency lights

Small size ideal for junction box mounting in wireless lighting control systems
