

The LMJA-9xxx-SM is a Network Controller designed to communicate with Wired and Wireless DLM Network Bridges, for local in-room wired networks and/or LMCP panels. It provides control, monitoring, adjustment, and standard scheduling functionality for networked DLM systems. The Network Supervisor is a PC server running similar software designed to coordinate control of multiple LMJA-9xxx-SMs and store historical data.

Features & Benefits

- Provides global control of DLM segment networks and access to advanced features
- Support for both Wired and Wireless DLM network Bridges
- Runs Niagara N4.9 with DLM Segment Manager Station
- Designed for and supports third party integration with BAS through BACnet/IP
- Create, view and edit building schedules and scenes
- Can support custom floor plans UI through 3rd party

Specifications

General Info

Product Line	Wattstopper	UPC Number	754182945092
Country Of Origin	United States	Application Sector	Commercial
Standard	BACnet, Niagra 4	Type	System Software

Additional Information

RoHS Compliant	Yes	Security	Yes
----------------	-----	----------	-----

Technical Information

Compatibility	DLM Segment Manager, DLM Wired
