

The Legrand POL splitters are point to multipoint cassettes designed to split SC connectors over a Passive Optical LAN (POL) that provides the capability to securely deliver voice, data and IP/broadband video. A POL is an alternative to a traditional Ethernet LAN and is widely accepted as an ideal replacement of old copper networks. A POL allows you to optimize your resources with a simple, space saving installation and provides benefits such as cost reductions, greater efficiencies, scalability and a clear upgrade path.

## Features & Benefits

**Energy Efficiency:** A POL uses unpowered optical components

**Cost Reduction:** A POL requires less power, cooling, and maintenance

**Versatile Installation:** Splitter cassette loads into front of enclosure tray drawer face or mounting bracket

**Future Proof Infrastructure:** Scalable and has a clear upgrade path

## Specifications

### General Info

|                   |                           |                    |              |
|-------------------|---------------------------|--------------------|--------------|
| Product Line      | Ortronics                 | UPC Number         | 662875924449 |
| Country Of Origin | Taiwan, Province Of China | Application Sector | Commercial   |
| Standard          | TIA-568-C.3               | Type               | Cassette     |

### Dimensions

|                   |         |                   |         |
|-------------------|---------|-------------------|---------|
| Product Width US  | 4.24 in | Product Height US | 1.23 in |
| Product Length US | 1.0 m   |                   |         |

### Additional Information

|                 |     |
|-----------------|-----|
| RoHS Conformant | Yes |
