

Ortronics M4 2x32 Pol Splitter - SC/APC Connectors - 1m Pigtails

Part No. M4S2132SA091M

The M4 2x32 POL Splitter is a point to multipoint cassette designed to split 2 SC connector to 32 SC connectors over a Passive Optical LAN (POL) that provides the capability to securley deliver voice, data, and IP/broadband video. A POL is an alternative to a traditional Ethernet LAN and is widely accepted as an ideal replacement of old copper networks. A POL allows you to optimize your resources with a simple, space saving installation and provides benefits such as cost reductions, greater efficiencies, scalability and a clear upgrade path. -

Features & Benefits

Energy Efficiency: A POL uses unpowered optical components Higher Security: A POL supports 128-bit encryption

Future Proof Infrastructure: Scalable and has a clear upgrade Simple Installation: Simple Installation: A POL has a fraction of the equipment used in a traditional LAN path

Cost Reduction: A POL requires less power, cooling, and maintenance

Versatile Installation: Splitter cassette loads into front of enclosure tray drawer face or mounting bracket

Single Fiber Two-way Transmission: Reduces cable bulk and increasing airflow in pathways
