

Ortronics
MDC Cleaning Tool
Part No. MDC-CLEANER

The MDC Cleaning Tool has a simple push to clean design enabling easy reach for behind panel connector end face cleaning or cleaning connectors while in hand. This tool has been designed for more than 525 engagements, leaving the end face clean and free of contamination due to the non-fraying cloth design and the anti-static system.

Features & Benefits

Extended Use: Robust design enables each tool to be engaged (push clean) more than 525 times

Pristine Endface: The MDC cleaning system minimizes contamination attraction, due to the anti-static system and non-fraying cloth design, leaving the fiber endface clean and in optimal condition for mating

Versatile Functionality: The push clean style design enables cleaning of cable assemblies behind panels and in hand

Specifications
