

The aluminum I-beam design of ITray is perfect for industrial installations with large diameter cables in long span situations, minimizing total tray width and creating a smooth transition between straight sections and fittings. A structural offset in the sidewall creates strong, mid-span splices that need fewer supports. Each splice snaps in place and stays without holding. Additionally, only four bolts are needed for each splice reducing hardware needs by 50%. These features allow Itray to be installed up to 30% faster than standard tray.

## Features & Benefits

Includes splices and hardware

## Specifications

### General Info

|              |                 |                    |                        |
|--------------|-----------------|--------------------|------------------------|
| Product Line | Cablofil        | Finish             | Aluminum               |
| UPC Number   | 800388116238    | Country Of Origin  | Mexico                 |
| Bottom Type  | Ladder          | Application Sector | Commercial, Industrial |
| Type         | Vertical Elbows |                    |                        |
