

Ì

Cablofil Vertical Elbow Dividers Part No. P319089

installations with large diameter cables in long span situations, minimizing total tray width and creating a smooth transition between straight sections and fittings. A structural offset in the sidewall creates strong, mid-span splices that need fewer supports. Each splice snaps in place and stays without holding, Additionally, only four bolts are needed for each splice reducing hardware needs by 50%. These features allow Itray to be installed up to 30% faster than standard tray.

The aluminum I-beam design of ITray is perfect for industrial

## Features & Benefits

Material: Aluminum	Each divider includes two self-drilling screws
Specifications
