

Wattstopper
Discontinued - PIR Dimmable Wall Switch Sensor, 120/277V, Ivory, USA
Part No. PW-100D-I-U

The PW-100D and PW-101D passive infrared (PIR) dimmable wall switch sensors can turn light OFF and ON based on occupancy. It is characterized by high sensitivity to small and large movements, appealing aesthetics, and a variety of features.

Features & Benefits

High sensitivity and dense coverage for exceptional performance	Defaults to Manual-ON operation for maximum energy savings
Color-matched lens and low profile for appealing design	Pushbutton dimming control and optional locked preset level for many lighting types
Selectable operation, walk-through, test and presentation modes for increased energy savings and convenience	Part of a comprehensive line of PIR, Ultrasonic and Dual Technology wall switch sensors

Specifications

General Info

Product Line	Wattstopper	Replaced by Part Number	PW-101D-I-U
Color	Ivory	UPC Number	754182938476
Country Of Origin	United States		

Additional Information

Product Environmental Profile	Yes
-------------------------------	-----

Technical Information

Sensor Type	Occupancy	Amperage	4.3 A
Wattage	1200 W	Voltage	120/277 V
