

Male Conduit Grip 2.5-inch Diameter Insulated

Features & Benefits

Liquid-Tight grips are woven of stainless steel mesh with zinc plated steel or malleable iron bodies and nuts for corrosion resistance. They are used to connect liquid-tight flexible conduit to electrical enclosures to prevent conduit pullout. Each fitting is supplied with an insulated throat to provide conductor insulation and protect against damage by flexing, heat expansion and contraction.

Liquid-Tight grips are recommended in the wiring of motors and any electrical enclosure where liquid-tight conduit is subject to motion or strain. Mesh Length: 9.625

Specifications

General Info

Product Line	Pass & Seymour	UPC Number	785007981742
Country Of Origin	Mexico	Construction	Support and Strain Relief Grips, Various Types of Pulling
Application Sector	Industrial	Standard	UL/CSA Approval (consult factory)

Listing Agencies / 3rd Party Agencies

CSA Listed	Yes
------------	-----

Technical Information

Capacity	Various Cable Diameter Ranges	Mounting	Consult the Factory for Mounting Recommendations
Load	Strain Relief Grips are designed to prevent tension from being transferred to junctions and terminals on electrical cord
