

Trapeze supports suspend trays from threaded rods, providing stable overhead routing with flexible mounting options.

Wire mesh tray ceiling supports suspend and stabilize tray systems overhead, providing reliable load support, flexible mounting options with compatible hardware, and efficient use of vertical space for clean, scalable installations.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Universal Tray Compatibility: Fits all wire mesh cable tray widths and depths and mounts to any side wire for greater installation flexibility.

Accessible Cable Pathway: Allows the tray to detach from one side of the support so installers can add or modify cables without dismantling the entire trapeze system.

Fast, Secure Attachment: Installs around a tray T-weld or between upright wires, while bendable tabs lock the tray and threaded rod securely in place. Threaded rods, nuts and washers are sold separately.

Multiple Threaded Rod Sizes: Accommodates 1/4-, 3/8- and 1/2-inch all-threaded rod for a range of trapeze-mounted support configurations.

Multilevel Installation Support: Allows threaded rod to extend beyond the clip, making it easier to create stacked or multilevel overhead cable pathways.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Supports		

Additional Information

Product Environmental Profile	Yes
