

This bottom-mount dropout creates smooth cable exits, protecting cables and enabling fast, secure installation. Integrated wire mesh tray dropouts create smooth cable exit points, protecting cable jackets, maintaining proper bend radius, and ensuring quick, secure installation with easy-to-attach hardware.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

4-Inch Cable Opening: Accommodates smaller cable bundles as they enter or exit through the bottom of wire mesh cable tray.

Hardware-Free Installation: Snaps directly into the tray without additional mounting hardware for faster, simpler field installation.

Extended Cable Support: Side wings provide a wider support surface beyond the tray, while integrated tie-down slots help secure cables as they leave the pathway.

2-Inch Bend Radius: Creates a full 90-degree transition that eliminates pressure points and helps reduce stress on copper, fiber optic and communications cabling.

Flexible Mounting Orientation: Installs parallel or perpendicular to the tray bottom and is compatible with all wire mesh cable tray sizes.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Dropouts		

Additional Information

Product Environmental Profile	Yes
