

The 2" Deep Wire Mesh Cable Tray to create a dedicated pathway for all low-voltage and data cables.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

2-Inch-Deep Design: Provides a low-profile cable pathway for installations where overhead or mounting space is limited.

Open Wire Mesh Construction: Promotes airflow, and keeps cables visible and accessible for maintenance and future changes.

Field-Fabricated Flexibility: Easily cuts and forms into bends, tees and elevation changes to adapt to jobsite conditions.

Special Safe-T-Edge: protects installers from sharp ends while it prevents cables from being damaged.

Available in a Variety of Finishes: Electro Zinc, High Resistance, Stainless Steel 316L, Black Painted, and other Painted.

Optimized Wire Design (Patented): Engineered with a precise wire diameter to deliver maximum strength where it matters, ensuring higher load capacity while reducing excess material for improved efficiency and performance.

Fast, Lightweight Installation: Manageable tray sections and streamlined accessories help reduce installation time and labor.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Straight Sections		

Additional Information

Product Environmental Profile	Yes
