

Cablofil
Wire Mesh Flexible Divider Strip
Part No. COT F

These Wire Mesh Cable Tray Dividers that separates cables on sweeps and bends.

Integrated dividers help organize and separate cables within a single tray, ensuring clean, efficient routing through straight runs, bends, and transitions for a more structured and manageable installation.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Flexible Cable Separation: The notched design bends to maintain dedicated cable pathways through horizontal turns and changing tray configurations.

Matched Tray Heights: Available in nominal 2-, 4- and 6-inch heights to coordinate with standard wire mesh cable tray depths.

Multiple Finish Options: Available in pregalvanized and painted finishes, with 316L stainless steel offered in select heights for demanding environments.

6-Foot Divider Sections: Each 72-inch section provides continuous separation through bends, tees and other field-fabricated transitions.

Included Mounting Hardware: Each kit includes four bolts, four hex nuts and four square washers for secure attachment to the tray.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Dividers		

Additional Information

Product Environmental Profile	Yes
