

Cablofil  
Wire Mesh Divider Strip  
Part No. COT

These Wire Mesh Cable Tray Dividers for cable separation within a single tray.

Integrated dividers help organize and separate cables within a single tray, ensuring clean, efficient routing through straight runs, bends, and transitions for a more structured and manageable installation.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

## Features & Benefits

**10-Foot Cable Separation:** The 118.11-inch-long divider creates dedicated pathways for organizing different cable types within a single wire mesh tray.

**Secure Tray Attachment:** Fold-over tabs fasten the divider directly to the tray, while attachment hardware is included with the 2- and 4 - inch kits.

**Multiple Finish Options:** Available in pregalvanized, painted, high-resistance and 316L stainless steel configurations for different installation environments.

**Matched Tray Heights:** Available in nominal 2-, 4- and 6-inch heights to coordinate with standard wire mesh cable tray depths.

**Field-Fabricated Flexibility:** The metal divider can be cut with tin snips to accommodate changes in pathway elevation.

## Specifications
