

These Wire Mesh Cable Tray Dividers that keeps different cabling types separated in a single pathway. Integrated dividers help organize and separate cables within a single tray, ensuring clean, efficient routing through straight runs, bends, and transitions for a more structured and manageable installation.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Snap-In Cable Separation: Mounts directly to wire mesh cable tray to create dedicated pathways for organizing different cable types.

Compact Wire Design: Provides effective cable separation without the added bulk of a full-length solid divider.

Two Divider Sizes: Available in 1/2-inch and 1-inch sizes to support different cable bundle and separation requirements.

Electroplated Zinc Finish: Provides durable performance for commercial and industrial cable management applications.

RoHS-Compliant Construction: Meets applicable material restrictions for a more environmentally responsible cable management solution.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Dividers		

Additional Information

Product Environmental Profile	Yes
