

These Wire Mesh Cable Tray Divider clips that aligns dividers to minimize cable damage. Integrated dividers help organize and separate cables within a single tray, ensuring clean, efficient routing through straight runs, bends, and transitions for a more structured and manageable installation.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Hardware-Free Divider Connection: Clips directly onto adjacent divider sections without bolts, nuts or separate mounting hardware for faster installation.

Aligned Cable Separation: Holds divider sections in line to create a smoother, more continuous separation pathway that helps minimize cable damage.

Compact 2.75-Inch Design: Measures approximately 2.75 inches long by 0.8 inches high, providing a low-profile connection between divider sections.

Improved Electrical Continuity: All-metal construction helps maintain electrical continuity between connected metal divider sections.

Easy Removal and Multiple Finishes: Can be removed with a screwdriver for pathway modifications and is available in painted black, pregalvanized and passivated 316 stainless steel options.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Dividers		

Additional Information

Product Environmental Profile	Yes
