

Cablofil
Cablobend Flex Wire Mesh Tray
Part No. Cablobend

Cablobend Systems give you the freedom for true cable tray flexibility by allowing you to create the bends and drops that you need without cutting. No more cutting unless shortening the length! Every data center requires numerous cable tray bends and drops—sometimes thousands in just one installation.

With traditional cutting and bending, each drop can take over four hours to complete; with Cablobend Systems, you have the freedom to flexibly create the bends and drops that you need.

Features & Benefits

Cut-Free Bend Formation: Flexible wires form vertical and horizontal bends without cutting the tray, helping reduce installation time, tools and sharp-edge risks.

Preassembled for Faster Installation: Arrives premade and ready to shape, helping increase prefabrication efficiency and complete each bend in minutes.

Multiple Sizes and Finishes: Available in 2-, 4- and 6-inch heights; 6-, 8-, 12-, 18- and 24-inch widths; and electrozinc or black finishes.

Adjustable to 90 Degrees: Bends vertically or horizontally up to 90 degrees to accommodate elevation changes, turns and complex pathway configurations.

Included Rigidity Clips: Supplied clips connect sections and add strength where additional pathway rigidity is required.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Cablobend		

Additional Information

Product Environmental Profile	Yes
