

This universal splice bar is ideal for fast, secure splicing solutions for joining cable trays, simplifying installation while ensuring strength and saving time. Wire mesh tray splicing solutions securely join tray sections while enabling fast installation, strong connections, and flexible routing without complex hardware.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

- 43.31-Inch Splice Bar:** Provides ample material for connecting straight tray sections and creating custom field-fabricated fittings.

Hand-Formable Construction: Bends by hand for use in tees, elbows and other custom wire mesh cable tray configurations.

UL-Classified Finish Options: Electroplated zinc and high-resistance versions are UL Classified for dependable cable pathway connections. Splice hardware is sold separately.
- Cut-to-Fit Design:** Can be trimmed with a bolt cutter to match the length and configuration required for each installation.

Multiple Finish Options: Available in electroplated zinc, black, white, custom-painted, high-resistance and 316 stainless steel finishes.

Compatible accessories available separately.
