

Cablofil
Wire Mesh Fast Splice
Part No. EDRN

Fast splice joins cable trays quickly, reducing install time while ensuring strong, secure connections. Wire mesh tray splicing solutions securely join tray sections while enabling fast installation, strong connections, and flexible routing without complex hardware.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

- Up to 50% Faster Installation: Joins wire mesh cable tray sections in up to half the time required for traditional bolted connections, helping reduce jobsite labor.
- Fast Tray-to-Tray Connection: Secures two wire mesh cable tray sections together without assembling separate nuts, bolts and splice washers.
- Broad Tray Compatibility: Designed for use with wire mesh cable tray ranging from 2 to 24 inches wide.
- Assembly Tool Included: Each 50-piece package includes the dedicated EDRNTOOL assembly tool required to install the splices.
- Durable Carbon Steel Construction: Available in multiple painted finishes for commercial and industrial applications, with UL-Classified options offered for qualifying configurations.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Splicing		

Additional Information

Product Environmental Profile	Yes
