

Cablofil
Wire Mesh 90° and Tee Bend Kit
Part No. EZT 90 KIT

This tee bend kit creates smooth direction changes in cable tray runs, supporting cables through tees or 90° bends for reliable, continuous routing. A complete range of bend solutions, including radius tees and elevation changes, enables smooth directional transitions while maintaining cable support and installation efficiency.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

One Kit, Multiple Configurations: Includes the hardware required to create one tee fitting or two 90-degree bends, reducing the number of components needed onsite.

Secure UL-Classified Splice: Creates a strong, code-compliant connection between field-fabricated tray sections.

Multiple Finish Options: Available in electrozinc, painted, high-resistance, black painted and stainless steel finishes for indoor, outdoor and demanding installation environments.

Universal Slotted Design: Fits any wire mesh cable tray size and eliminates the need for precise tray alignment during installation.

Optimized Bend Placement: Installs between the tray's top two wires to support properly formed 90-degree bends and tee intersections.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Bends		

Additional Information

Product Environmental Profile	Yes
