

Ceiling brackets suspend trays under ceilings or overhangs, providing secure support with fast, hardware-efficient mounting. Wire mesh tray ceiling supports suspend and stabilize tray systems overhead, providing reliable load support, flexible mounting options with compatible hardware, and efficient use of vertical space for clean, scalable installations.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Ceiling and Overhang Support: Designed to suspend wire mesh cable tray beneath ceilings, structural overhangs and other elevated mounting surfaces.

Stackable C-Shaped Design: Multiple brackets can be installed vertically to create tiered cable pathways and support multiple levels of wire mesh tray.

Hardware-Free FAS Attachment: Patented locking tabs secure the tray directly to the bracket without separate nuts, bolts or tray clamps, helping reduce installation time.

Size-Specific Load Capacity: Working load varies by bracket length, with the 4-inch model rated for 264 pounds and the 12-inch model rated for 100 pounds.

Multiple Material and Finish Options: Available in painted carbon steel and passivated 316 stainless steel configurations for commercial and industrial installation environments.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Supports		

Additional Information

Product Environmental Profile	Yes
