

This specialized bracket terminates trays at walls or floors, providing secure support and clean cable routing at pathway endpoints. Wall supports provide secure, space-efficient mounting to walls or structures, ensuring strong, stable cable pathways while simplifying installation with compatible hardware and adaptable configurations.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Wall or Floor Termination: Secures wire mesh cable tray where the pathway ends at a wall or floor, creating a stable, finished transition point.

Matched Tray Depths: Available in HB2 and HB4 configurations to coordinate with 2- and 4-inch-deep wire mesh cable tray.

Multiple Finish Options: Available in pregalvanized, black, white, special-painted and 316L stainless steel configurations for different installation environments.

Slotted Mounting Design: Multiple 0.28-by-0.98-inch slots provide flexible positioning for attaching the bracket to the mounting surface and securing the tray.

Complete Installation Kit: Each kit includes one termination bracket, two EZBN1/4 fasteners and two CE25 splice washers.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Accessories		

Additional Information

Product Environmental Profile	Yes
