

Cablofil
Wire Mesh Metal Inserts
Part No. INSERT

The Metal tray insert protects cables and creates a smooth pathway while covering the tray underside for added cable protection. Complementary wire mesh tray inserts further improve organization by adding protection, cable separation, and a clean, finished look—while covering the tray underside to safeguard cables below and installing quickly with compatible hardware.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

0.04-Inch Metal Liner: Creates a smooth, continuous surface along the bottom of the tray to support cables and reduce contact with the wire grid.

Built-In Bend-Over Tabs: Integrated tabs secure the insert directly to the wire mesh tray without separate attachment hardware.

Multiple Finish Options: Available in pregalvanized, black painted, white painted, custom-painted and 316L stainless steel configurations for different installation environments.

Two-Piece, 10-Foot Coverage: Each package includes two 5-foot insert sections designed to cover one standard 10-foot wire mesh cable tray run.

Seven Width Options: Available widths range from approximately 3.39 to 23.39 inches to coordinate with common wire mesh cable tray sizes.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Inserts		

Additional Information

Product Environmental Profile	Yes
