

This over-the-top dropout routes cables smoothly over tray edges, protecting cables and enabling fast, tool-free installation. Integrated wire mesh tray dropouts create smooth cable exit points, protecting cable jackets, maintaining proper bend radius, and ensuring quick, secure installation with easy-to-attach hardware.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

No-Cut, Snap-On Installation: Attaches directly to the wire mesh tray without mounting hardware or cutting side wires, helping preserve tray strength and reduce installation time.

Cable Pass-Through Design: Inner ramps allow existing cables to continue beneath the dropout on CF105 and CF150 Series trays, supporting more flexible pathway layouts.

Broad Tray Compatibility: Fits CF54 trays 12 inches wide and larger, CF105 trays 6 inches wide and larger, and all CF150 tray widths. The compact dropout measures approximately 4.47 inches wide, 3.15 inches deep and 2.42 inches high.

Fiber-Friendly Cable Transition: Creates a smooth pathway for fiber optic and other sensitive cabling entering or exiting over the side of the tray.

Integrated Hold-Down Slots: Built-in slots accommodate cable ties to help secure bundles and maintain stability as cables transition out of the tray.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Dropouts		

Additional Information

Product Environmental Profile	Yes
-------------------------------	-----
