

Cablofil
Wire Mesh 12" Radius Tee 90° Kit
Part No. RADT 90 12 KIT

This radius tee kit creates smooth direction changes in cable tray runs, supporting cables through tees or 90° bends for reliable, continuous routing. A complete range of bend solutions, including radius tees and elevation changes, enables smooth directional transitions while maintaining cable support and installation efficiency.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

- 12-Inch Bend Radius: Creates a gradual pathway transition that helps simplify pulling MC cable, large power cables and other cable bundles through turns and intersections.
- One Tee or Two 90-Degree Bends: Each kit includes the components needed to construct one field-fabricated tee fitting or two 90-degree bends.
- Complete Installation Hardware: Includes two radius splice components, ten 1/4-inch fasteners, eight CE25 connectors and four CE40 connectors.
- Integrated Cable Containment: Top wire loops help keep cables positioned inside the tray while they are pulled through the bend or tee.
- Multiple Tray Depths: Available for 2-, 4- and 6-inch-deep wire mesh cable tray, with UL Classified splice connections for dependable pathway construction.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Bends		

Additional Information

Product Environmental Profile	Yes
