

Cablofil
Wire Mesh 6" Radius Tee 90° Kit
Part No. RADT 90 KIT

This radius tee kit creates smooth direction changes in cable tray runs, supporting cables through tees or 90° bends for reliable, continuous routing. A complete range of bend solutions, including radius tees and elevation changes, enables smooth directional transitions while maintaining cable support and installation efficiency.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

One Tee or Two 90-Degree Bends: Each kit includes the components needed to create one field-fabricated tee fitting or two 90-degree bends.

Complete Installation Hardware: Includes two radius splice components, ten EZBN1/4 fasteners, eight CE25 washers and four CE40 washers to create smooth 90 degree transitions that support cables, ease pulling, and maintain secure, UL-classified connection

Easier Cable Pulling: Creates a sturdy, gradual transition that helps installers pull MC cable, large power conductors and other cable bundles through pathway turns.

Integrated Cable Containment: Top wire loops help keep cables positioned inside the tray while they are pulled through the bend or tee.

Multiple Depth and Finish Options: Available for 2-, 4- and 6-inch-deep wire mesh cable tray in electrozinc, black, white and custom-painted finishes, with UL Classified splice connections.
