

This square splice washer is used to secure tray connections on bends and direction changes. Wire mesh tray splicing solutions securely join tray sections while enabling fast installation, strong connections, and flexible routing without complex hardware.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Secure Tray Connections: Works with 1/4-inch carriage-bolt hardware to join wire mesh cable tray sections and create bends, turns and tees.

UL-Classified Splicing: CE25 splice washers form a UL-Classified connection when installed with the specified tray-splicing hardware.

Multiple Finish Options: Available in several configurations, including electrozinc, black, white, painted and 316L stainless steel, to coordinate with different tray finishes and installation environments.

CE25 and CE40 Options: Available in a compact CE25 small-square design and a larger CE40 square configuration to support different splicing applications.

Bulk Packaging: CE25 washers are supplied in packages of 50, while CE40 washers are available in 25-piece packages.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Splicing		

Additional Information

Product Environmental Profile	Yes
