

The 1" Deep Telex rail that allows trays to lay flat on cabinet or machinery without rocking. Optimized for data centers and demanding applications, Telex is designed to support demanding cable volumes, rapid changes, and scalable infrastructure needs.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

## Features & Benefits

**1-Inch-Deep Design:** Provides an ultra-low-profile pathway for routing smaller cable bundles in tight or space-constrained installations.

**Expandable Pathway Design:** Compatible sections can be joined with splice hardware to extend cable runs as project requirements change.

**Targeted Cable Routing:** Supports organized cable distribution around equipment, control panels and other localized connection points.

**Durable Finish Options:** Available in electroplated zinc and stainless steel to support a variety of commercial and industrial environments.

## Specifications
