

Standoff mounts tray off surfaces, providing spacing for airflow and cable protection with quick installation. Wire mesh tray underfloor supports provide stable, low-profile mounting solutions that secure trays beneath raised floors, enabling organized cable routing, efficient space utilization, and easy installation with compatible hardware for flexible configurations.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

2-Inch Tray Compatibility: Designed to attach 2-inch wire mesh cable tray to cabinet tops and channel framing for compact cable pathway installations.

Hardware-Free Tray Attachment: Integrated fold-over tabs secure the tray directly to the standoff without separate nuts, bolts or clamps.

0.3-Inch Standoff Height: Elevates the tray approximately 0.3 inch, or 8 mm, above the mounting surface while maintaining a low-profile installation.

Compact Support Profile: Measures approximately 2.76 inches wide, 2.15 inches high and 1.38 inches deep for space-efficient mounting on cabinets and framing.

316 Stainless Steel Construction: Passivated stainless steel provides durable support for commercial and industrial cable management applications.
