

Underfloor clamps secure trays to raised floor posts, enabling stable support and clean cable routing below systems. Wire mesh tray underfloor supports provide stable, low-profile mounting solutions that secure trays beneath raised floors, enabling organized cable routing, efficient space utilization, and easy installation with compatible hardware for flexible configurations.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

FAS L Bracket Integration: Combines with FAS L Brackets to create a secure wire mesh cable tray support beneath raised-floor systems.

Reversible Support Plate: The support plate can be reversed when the post faces are positioned parallel to the raised-floor grid, helping the clamp adapt to different post orientations.

Durable Carbon Steel Construction: Available in multiple painted and pregalvanized configurations for commercial and industrial underfloor cable management applications.

Round and Square Post Compatibility: The U-bolt design attaches to both round and square raised-floor support posts for greater installation flexibility.

Compact Support Profile: Measures approximately 4.72 inches wide, 3.72 inches deep and 2.13 inches high, with a product weight of 0.7 pound.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Supports		

Additional Information

Product Environmental Profile	Yes
