

This underfloor bracket raises trays for accessible routing, providing stable support with fast, hardware-efficient installation. Wire mesh tray underfloor supports provide stable, low-profile mounting solutions that secure trays beneath raised floors, enabling organized cable routing, efficient space utilization, and easy installation with compatible hardware for flexible configurations.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

337-Pound Floor-Mount Capacity: Supports up to 337 pounds when installed horizontally beneath raised-floor systems for dependable cable pathway support.

Compact 3.9-Inch Bracket: Measures approximately 3.9 inches long, 3.2 inches wide and 2.1 inches high for space-efficient underfloor installation.

Multiple Material and Finish Options: Steel construction is available in pregalvanized, Geomet, painted and 316L stainless steel configurations for different installation environments.

Universal Tray Compatibility: Fits all wire mesh cable tray series and widths, with multiple brackets positioned together to support wider pathways.

Flexible Tray Attachment: Secures wire mesh tray using the compatible EDRNTOOL, while alternate clips or 1/4-inch fasteners support additional cable tray configurations.
