

Underfloor supports mount Wire Mesh trays to surfaces, providing stable routing with fast, hardware-efficient installation. Wire mesh tray underfloor supports provide stable, low-profile mounting solutions that secure trays beneath raised floors, enabling organized cable routing, efficient space utilization, and easy installation with compatible hardware for flexible configurations.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Independent Raised-Floor Support: Mounts directly to the floor deck and supports wire mesh cable tray independently of the raised-floor structure.

Hardware-Free FAS Attachment: Patented locking tabs secure wire mesh cable tray directly to the support without separate nuts, bolts or tray clamps.

Multiple Sizes and Finishes: Available in configurations from 2 to 12 inches high and for tray widths from 6 to 20 inches, with painted and pregalvanized carbon steel options and UL-Classified configurations available.

Slotted Floor-Deck Mounting: Integrated slotted holes provide positioning flexibility and allow the support to be attached quickly to the floor deck.

Accessible Underfloor Pathway: Elevates the cable tray within easy reach of raised-floor openings, helping simplify cable installation, maintenance and future changes.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Supports		

Additional Information

Product Environmental Profile	Yes
