

Wire Mesh tray accessories connect trays to conduit, racks, and equipment, enabling fast installation and versatile system integration.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Complete Pathway Connections: Penetration sleeves, tray-to-ladder clamps, Fastrut connectors and angle brackets help connect wire mesh tray to walls, ladder tray, strut and adjoining pathway sections.

Organized Cable and Conduit Support: Cable guides, hook-and-loop rolls, snap-on J-hooks, conduit attachments and clamp kits help route, secure and separate cables and conduit along the pathway.

Installation and Pathway Completion: Bolt cutters support field fabrication, while bridges, blind ends, slip-on lock nuts and other specialized accessories help elevate, terminate and adapt tray runs to jobsite requirements.

Integrated Equipment Mounting: Universal mounting plates provide a dedicated attachment point for security cameras, wireless access points, electrical boxes and other devices directly on the tray.

Grounding and Bonding Components: Wire mesh hooks and grounding lugs support properly positioned grounding conductors and dependable electrical connections throughout the tray system.
