

Cablofil Wire Mesh Cable Tray Ceiling Mounting

Part No. Wire Mesh Ceiling Supports

Wire Mesh ceiling supports suspend trays overhead, providing stable support, flexible mounting, and efficient use of space. Wire mesh tray ceiling supports suspend and stabilize tray systems overhead, providing reliable load support, flexible mounting options with compatible hardware, and efficient use of vertical space for clean, scalable installations.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Multiple Ceiling-Mount Configurations: Choose from FAS Profiles, Center Hangers, C-Shaped Brackets and Trapeze Hanging Clips to accommodate single-rod, trapeze and multilevel installations.

Single-Rod Center Hanging: Center Hangers suspend tray widths from 8 to 24 inches using only one threaded rod, while the suspension tube helps protect cables passing beneath the support.

Hardware-Free FAS Attachment: Patented locking tabs secure the tray to FAS Profiles and C-Shaped Brackets without separate nuts, bolts or tray clamps, helping reduce installation time.

Multilevel Pathway Support: Stackable C-Shaped Brackets and Trapeze Hanging Clips that allow threaded rod to extend beyond the support make it easier to build tiered overhead cable pathways.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Supports		

Additional Information

Product Environmental Profile	Yes
