

Cablofil  
Wire Mesh Cable Tray Covers  
Part No. Wire Mesh Covers

Wire Mesh Cable Tray Covers protect cables from dust with built-in tabs, easy removal, and field-fit installation.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

## Features & Benefits

**Three-Piece, 10-Foot Coverage:** Each package includes three approximately 39.5-inch cover sections to protect one standard 10-foot wire mesh cable tray run.

**Durable Carbon Steel Construction:** The rigid metal cover provides physical protection for cables while helping prevent dirt and dust from collecting inside the pathway.

**Multiple Widths and Finishes:** Available in sizes matched to common tray widths and in painted, pregalvanized, high resistance and stainless steel options for different installation environments.

**Built-In Attachment Tabs:** Integrated tabs bend around the tray wires to create a secure, permanent connection without separate cover clamps.

**Field-Fabricated Flexibility:** Cover sections can be cut and formed onsite to follow changes in pathway elevation and other tray configurations.

Accessories available (CLIP F02) for installations where cover (CVN) is removed frequently.
