

Cablofil
Wire Mesh Cable Tray Dividers
Part No. Wire Mesh Dividers

These Wire Mesh Cable Tray Dividers organize and separate cables within a tray, ensuring clean routing through runs, bends, and transitions.

Integrated dividers help organize and separate cables within a single tray, ensuring clean, efficient routing through straight runs, bends, and transitions for a more structured and manageable installation.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Dedicated Cable Separation: Divides a single wire mesh tray into separate pathways, allowing power, data and communications cabling to be organized within the same tray.

Matched Tray Depths: Available in 2-, 4- and 6-inch heights to coordinate with standard wire mesh cable tray depths.

Straight and Flexible Options: Rigid dividers support straight tray runs, while 72-inch flexible divider strips help maintain cable separation through bends, tees and changing pathway configurations.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Dividers		

Additional Information

Product Environmental Profile	Yes
