

These dropouts create smooth cable exits, protecting cables and ensuring fast, secure installation. Integrated wire mesh tray dropouts create smooth cable exit points, protecting cable jackets, maintaining proper bend radius, and ensuring quick, secure installation with easy-to-attach hardware.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Application-Specific Dropout Options: Choose from Basic, Side, Universal, Center and Over-the-Top designs to support cable transitions from the bottom, side, end or center of the tray.

No-Cut Installation Options: Snap-in, interlocking and edge-mounted designs install without cutting or modifying the wire mesh tray, helping preserve pathway strength and reduce installation time.

Integrated Cable Management: Extended support surfaces and built-in tie-down or hold-down slots help organize and secure cable bundles as they enter or exit the tray.

Cable-Protecting Bend Radii: Basic Dropouts provide a full 90-degree transition with a 2-inch radius, while Standard Side Dropouts use a 3-inch radius to reduce pressure points and cable stress.

Multiple Cable Capacities: Dropout widths range from compact 4-inch options for smaller bundles to 24-inch Universal Dropouts for large-capacity copper, fiber optic and PoE pathways.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Dropouts		

Additional Information

Product Environmental Profile	Yes
-------------------------------	-----
