

The Wire Mesh Cable Tray Telex rail allows trays to lay flat on cabinet or machinery without rocking. Optimized for data centers and demanding applications, Telex is designed to support demanding cable volumes, rapid changes, and scalable infrastructure needs.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Compact Cable Pathway: Provides a low-profile solution for routing small cable runs in space-constrained installations.

Easy Pathway Expansion: Compatible with SWK splice hardware for connecting sections and extending cable runs as project requirements change.

Flexible Cable Routing: Supports clean cable distribution around equipment, control panels and other targeted connection points.

Durable Finish Options: Available in electroplated zinc and stainless steel configurations to support a variety of commercial and industrial environments.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Straight Sections		

Additional Information

Product Environmental Profile	Yes
