

This mesh adapter kit frames tray wall penetrations, providing secure support and clean cable routing through walls. This kit includes two EX BN 1/4" bolts/nuts and two CE 25 washers, allowing secure right-angle connections between smaller and larger trays for stable, reliable support.

Wire Mesh Cable Tray delivers reliable, high-performance cable management with an open design that enhances airflow, reduces heat buildup, and maximizes cable capacity. Its modular system enables fast installation, easy routing, and seamless future upgrades. The cable tray system offers a fast, flexible, and adaptable solution for cable management with easy installation and maintenance.

Features & Benefits

Rigid Penetration Support: Provides a safe, stable pathway for cable tray passing through a wall or floor while creating a clean, finished appearance around the opening.

Adjustable Loose Collar: A separate collar slides over the sleeve after installation to cover the opening and provide a more finished transition at the mounting surface.

Multiple Sizes and Galvanized Construction: Available in 4-, 5- and 6-inch heights and multiple widths, with durable carbon steel construction and a mill-galvanized finish for commercial and industrial applications.

20-Inch Sleeve Length: The fabricated sleeve measures 20 inches long and accommodates walls up to 8 inches thick.

Included Tray Connection Hardware: Two pairs of splice plates and compatible fasteners are supplied to attach cable tray sections on both sides of the penetration.

Specifications

General Info

Product Line	Cablofil	Application Sector	Data Center
Type	Penetration Sleeve		

Additional Information

Product Environmental Profile	Yes
