

From Messy to Managed: EV Cable Management Pedestal

Tired of tangled cables cluttering your charging stations?

Take your EV charging offerings to the next level with an innovative cable management solution. Our EV Cable Management Pedestal offers a sleek, organized and hassle-free charging experience. Each pedestal allows you to mount two Legrand EV chargers side by side for a streamlined cable management solution that keeps your cables off the ground and easily accessible to users.

Features and Benefits:

- **Front-Facing Dual Mount Design:** The side-by-side mounting plate accommodates two Legrand EV chargers allowing multiple drivers to charge their vehicle with ease in a variety of commercial applications.
- **Nearly 7-Foot Tall Cable Management Pedestal:** Easily accommodates 21-foot charging cables within 5-foot base pedestal, offering flexibility for reaching vehicles in various positions. Fully assembled pedestal reaches ~7-feet in height.
- **Cord Retractor Assembly:** Smoothly slide charger cords for easy extendibility when stations are in use, while keeping cords off the ground and neatly stored. Replacement retractors are also available.
- **Accessible Charger Plug Holders:** Conveniently stores and protects the charger plugs, making connecting vehicles hassle-free and accessible.
- **Easy Access Panel:** Protects electrical wiring while providing easy access to ample space for stress-free installation and maintenance.
- **Stylish Base Cover:** Protects the base of the pedestal while completing the solution's modern look with an added touch of aesthetic appeal.
- **Optional New Pour Anchor Kit:** An alternative accessory anchor kit with wet concrete L-bolt anchors is available for new pour applications. This must be ordered separately.

With our pedestal, you will experience:

- **Streamlined Cable Management:** No more charging cables on the ground. The pedestal easily lifts, secures and stores your cables, allowing for effortless maintenance of equipment and a clutter-free charging environment for drivers.
- **Enhanced Safety:** By keeping your charging cables off the ground, the pedestal will reduce potential tripping hazards, making your station areas safer and obstacle-free.
- **Efficient Use of Space:** The pedestal's modern design makes the most efficient use of your charging station space while making cables easily accessible to drivers and their vehicles.
- **Elevated Aesthetics:** Organized charging stations will instantly boost the aesthetic appeal of your property and attract more EV drivers seeking a fast, convenient charging experience.
- **Commercial Application Appeal:** The pedestal's front-facing, dual mounting design is ideal for commercial applications where multiple vehicles will be charging at one time.
