8″ Evolution™ Furniture Feed Poke-Thru

Power Right Where You Need It

Introducing the 8″ Evolution Furniture Feed Poke-Thru by Legrand – the ultimate solution for seamless power and data access. Designed to simplify core drilling sizes, this new model brings a more universal approach, allowing for easier installation.

The larger 8″ size gives end-users more room within the device, providing greater capacity for power, A/V and data connections without compromising the sleek, professional look of your space. Ideal for commercial environments, this device enhances both functionality and design, making it the smarter choice for flexible workspaces.

Larger 8″ Size:
Provides expanded space within the device, accommodating a higher volume of power, A/V and data connections.

Separate Compartments for Power, Data and A/V:
Organizes connections effectively for end-users, reducing interference and improving accessibility.

Designed to Simplify Core Drilling Sizes:
Designed to make installation easier and faster.

Versatile Installation:
Suitable for both retrofit and new construction, adapting to different project needs and perfect for evolving spaces.

Improved Aesthetics & Functionality:
Maintains a sleek, professional look with multiple cover options while delivering high-capacity, organized connectivity.
