

TECHNOLOGY-ENABLED SERVICE AGREEMENTS

The Wattstopper Technology-Enabled Service Agreements combines immediate remote support with the additional assurance of on-site support. Adding post-installation service support to the lighting control system adds immediate peace of mind. No matter what issues arise, you will not need to be a lighting controls expert. Your installed Digital Lighting Management (DLM), Wattstopper PLUS or Architectural Dimming lighting control system will be covered by a service plan that provides ongoing system maintenance and protection from unplanned interruptions. Whether you're a facility manager or building owner, prioritize your investment with a Wattstopper Technology-Enabled service plan for your Wattstopper lighting control system.

Technology-enabled service plans deliver immediate remote support, on-site support, and training. Remote support is performed by the Legrand Remote Operations Center (ROC) staffed with U.S.-based dedicated support technicians. On-site support and training are provided by highly skilled, factory-trained field service technicians, both with the know-how, experience, and resources to help maintain and optimize your building's lighting control system

NOTE: Service plan starts after completion of startup. Additionally, the end user must be registered to begin receiving service plan benefits.

BENEFITS

- **Dedicated Customer Success Representative:** A dedicated professional to manage your account, ensure the fulfillment of your agreement entitlements, and make necessary adjustments to meet your ongoing and future needs.
- **Dedicated Technical Phone Support:** Access to a dedicated support line connected to the Wattstopper Remote Operations Center (ROC).
- **Remote Diagnostics Support:** Comprehensive remote troubleshooting and configuration services, including schedule and setting adjustments, button configuration changes, space utilization modifications, energy code updates, and more.
- **Service Orientation:** An introductory call to familiarize you with your Customer Success representative, the ROC, and the remote support capabilities of the system. An overview of data analytics will be provided if this service is included in your agreement.
- **Onsite Training:** A Legrand-authorized technician will provide 8 hours of on-site training, which can be divided into two half-day sessions if necessary.
- **Onsite System Tuning Visits:** A Legrand-authorized technician will conduct up to 8 hours of on-site system tuning, either recommended by the ROC or requested by the customer, to address tuning requests or more complex issues, such as optimizing lighting configuration, integrating with building automation or management systems, or fine-tuning daylighting controls.
