# THE SAFE CHOICE FOR ADDING POWER AND CONVENIENCE.

Add greater power, safety and convenience to residential settings with the Wiremold® Plugmold® 2000TR Series Multioutlet System. This receptacle, designed to meet the 2008 NEC requirement 406.11 for tamper-resistant receptacles, features a patented internal shutter system that provides a clean and solid fit for standard three-pronged plugs while preventing the insertion of unwanted objects. Making this system one of the industry's safest and most convenient. And with the option for a number of durable finishes, steel or aluminum construction and up to ten receptacles, the Plugmold 2000TR Series is perfect for use in workshops, garages, kitchens and ideal for homes with small children.

Available in 3' and 5' lengths, the Plugmold 2000TR Series is the perfect solution to easily add power in smaller, more confined areas. Plus, with finishes like ivory, gray, white, black, stainless steel and anodized aluminum, it's no problem to match any décor.

## Meets new tamper-resistant requirements for 2008 NEC Section 406.11.
