EVOLUTION™ SERIES

legrand®

1 BOX.
MULTIPLE FLOOR TYPES AND SURFACES.

Until now, different floor types called for different style floor boxes. The idea that a single floor box could be used across multiple floor constructions was inconceivable. But with the introduction of the Evolution™ Series Floor Box, the time has come to change the way we think. And work. Because our latest offering is more than just a floor box. It's a more efficient way to do business.

Evolution Series Floor Boxes are designed for every type of floor construction. Whether used in wood, concrete or raised floors, the Evolution Series Floor Box installs with ease. They can be installed before or after the floor covering has been put down, and they are fully adjustable pre- and post-concrete pour. In addition, all boxes are TopGuard™ protected, keeping out water, dirt and debris.
