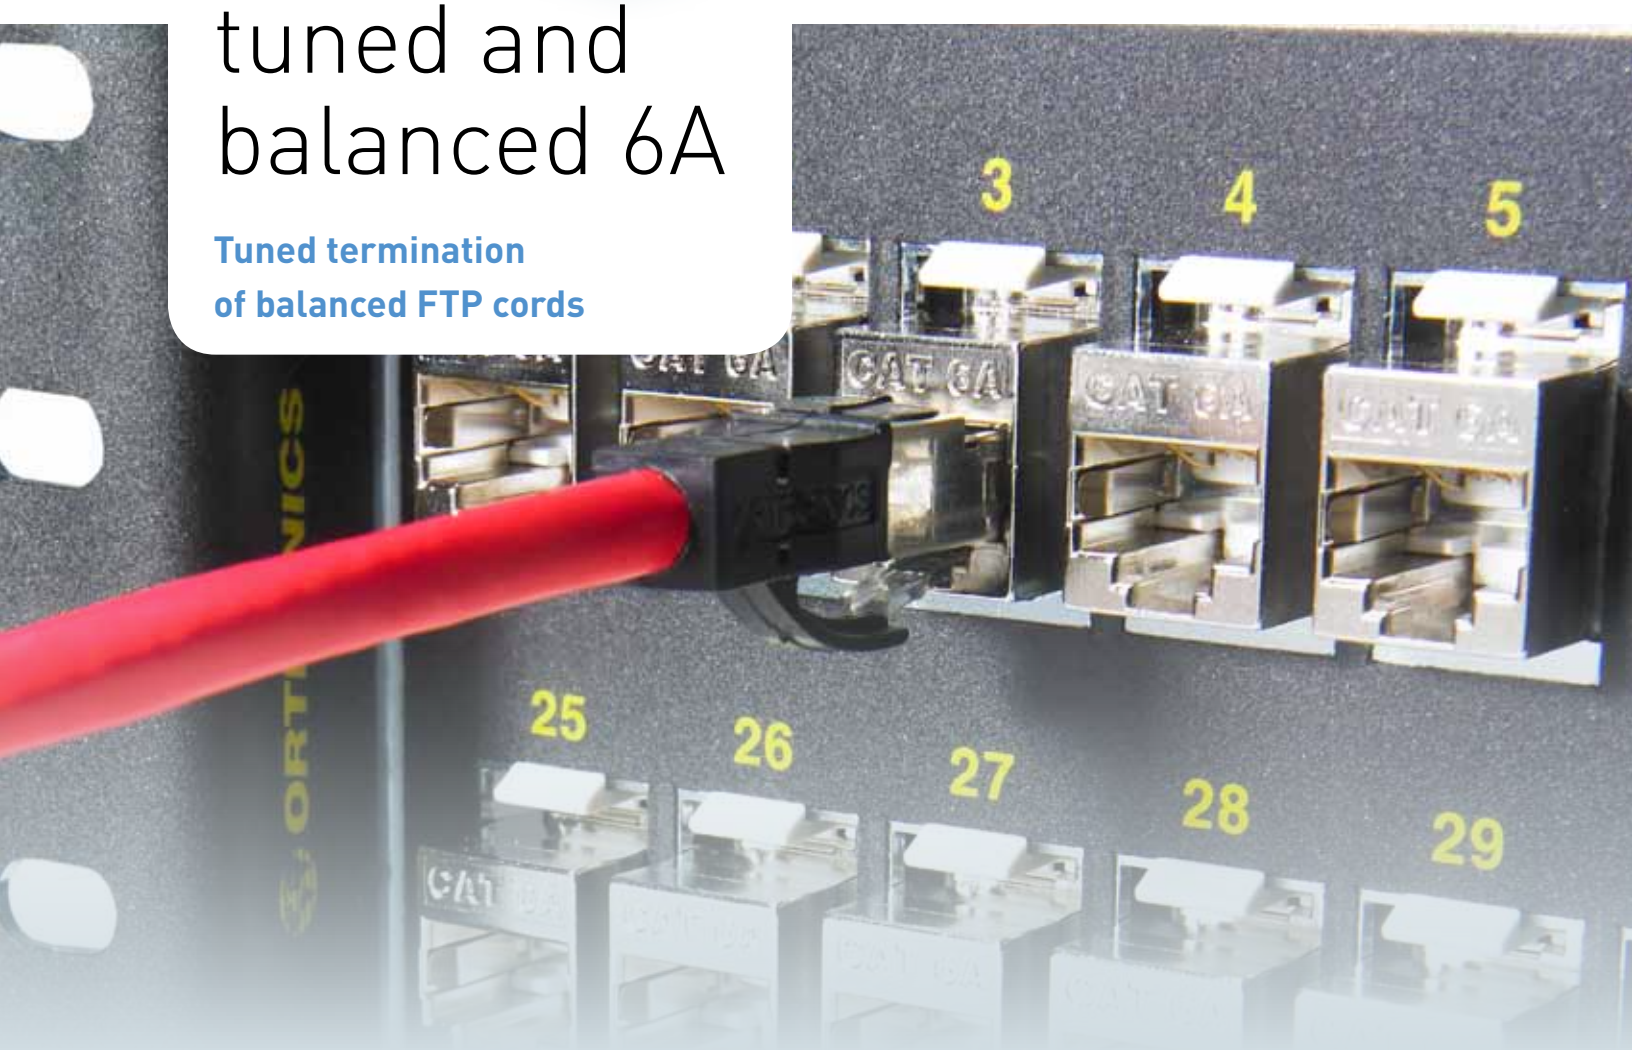
tuned and balanced 6A

Tuned termination of balanced FTP cords



Ortronics® Clarity 6A FTP patch cords use the combination of tuned plug terminations, grounding assurance and balance cabling to produce shielded patch cords that consistently provide elevated field performance. It all starts with the plug design and termination process. All efforts focused on minimizing the impact of the termination on the performance that is inherently available from a quality cord. Maintaining pair balance and signal integrity in a rigidly consistent manner ensures the internal performance of these cords.

This performance is further enhanced when connected to like tuned Clarity® 6A jacks or panels.

The FTP shield significantly enhances a cord's alien performance. To assure this performance, the plug termination must offer target transfer impedance with an optimal shield termination while not changing the impedance characteristics of the cable.

The result is Clarity 6A FTP cords deliver all the above for optimal channel performance.

FEATURES & BENEFITS

- Tuned to Ortronics jacks and panels for optimal channel performance
- ETL component verified, ensuring component compliance
- Shielded cord for elevated alien performance
- Target transfer impedance of the connection for shield effectiveness
- Balanced cable construction with measured TCL improves performance
- Part of the NetClear 6A channel solutions for NetClear warrantied performance

ORDERING INFORMATION:

CATEGORY 6a FTP/shielded patch cord

LENGTH (ft.)	RED	YELLOW	GREY
03	MCS6A03-02	MCS6A03-04	MCS6A03-08
05	MCS6A05-02	MCS6A05-04	MCS6A05-08
07	MCS6A07-02	MCS6A07-04	MCS6A07-08
09	MCS6A09-02	MCS6A09-04	MCS6A09-08
15	MCS6A15-02	MCS6A15-04	MCS6A15-08
20	MCS6A20-02	MCS6A20-04	MCS6A20-08
25	MCS6A25-02	MCS6A25-04	MCS6A25-08
